PROFESSIONAL SUMMARY

A Computer Science and Engineering student at Dhaka International University, currently in his 5th semester. He specializes in cybersecurity, application development, and bug bounty practices. He has experience in Python, Flutter, and system-level development, and has contributed to multiple research projects in areas such as intrusion detection, secure communication systems, and zero-trust security frameworks, with several papers accepted in academic venues.

EDUCATION

Bachelor of Science in Computer Science and Engineering (CSE) **2023 – Present**

Dhaka International University, Dhaka, Bangladesh Expected 2027

Current Status: 6th Semester, 3rd Year

Focused Specialization: Application Development, App Bug Bounty, Cybersecurity.

Higher Secondary Certificate (HSC) **2022**

GPA: 4.67 / 5.00

TECHNICAL SKILLS

- **Programming Languages:** Python, Flutter (Dart), C, Java, SQL
- **Cybersecurity & Ethical Hacking:** CTF Methodologies, Linux Administration, Ethical Hacking Principles, Network Defensive Security
- **Tools & Platforms:** Hack The Box, TryHackMe, PicoCTF, Git/GitHub, VS Code, Android Studio

PROJECTS & RESEARCH

Visiolock *Dart*	Engineered cross-media secure image transmission via audio-domain encoding and cryptography. (Publication Under Review)
Secure NFC *Lead Researcher*	Investigated Host Card Emulation (HCE) for mobile ticketing ecosystems to defend against Replay Attacks. (Publication Accepted)
Intrusion Detection System *Researcher*	Developed a real-time lightweight intrusion detection system utilizing optimized Deep Learning. (Publication Under Review)
Dyslexia Assessment System *Researcher*	Engineered a real-time assessment/assistance system using Speech and Behavioral Analytics. (Publication Under Review)
Offline Emergency Comms *Researcher*	Developed an infrastructure-free offline emergency system using adaptive hybrid mesh networking. (Publication Under Review)
SafeLink+ Framework *Researcher*	Designed a framework to protect users from malicious URLs via zero-trust execution models. (Publication Under Review)
Adaptive Firewall AI *Python*	Designed an intelligent firewall system in Python to adaptively detect and mitigate sophisticated network threats.
DIU CPC Web Portal *JavaScript*	Developed the dynamic web portal for the DIU Computer Programming Club using JavaScript and optimized UI interactions.
Personal Portfolio Website *JavaScript*	Designed and deployed a responsive, modern web portfolio utilizing complex JavaScript and dynamic CSS styling.
SlapApp & Crypto Apps *Flutter/Dart*	Built responsive mobile applications ("SlapApp" and "image-encryption") focusing on dynamic states and cryptography in Dart.
My Jarvis (AI Assistant) *Python*	Developed a localized, voice-activated AI desktop assistant in Python to automate computational tasks.
University Database *PostgreSQL*	Designed a PostgreSQL-backed structure to streamline university informatics and optimize query workloads.

EXTRACURRICULAR ACTIVITIES

- **General Secretary**, DIU Computer Programming Club (DIU CPC) **April 2026 – Present**
- **Volunteer**, 3rd International Conference on Big Data, IoT, and Machine Learning (BIM 2025) **2025**
- **Treasurer**, DIU Computer Programming Club (DIU CPC) **March 2025 – April 2026**
- **Executive Member**, DIU Computer Programming Club (DIU CPC) **2024 – 2025**
- **Executive Member**, BASIS (Bangladesh Association of Software and Information Services)
- **Lead Organizer**, CSE Fest Fall 2024 (Coordinated logistics and technical events)

PUBLICATIONS

1. **Secure NFC-Based Mobile Ticketing System Using Host Card Emulation (HCE):** Implementation and Analysis of Security Mechanisms Against Replay Attacks. *[Accepted]*
2. **VisioLock: Cross-Media Secure Image Transmission via Audio-Domain Encoding and Device-Bound Cryptography.** *[Accepted]*
3. **A Multimodal, Infrastructure-Free Offline Emergency Communication System for Mobile Devices Using Adaptive Hybrid Mesh Networking.** *[Accepted]*
4. **SafeLink+: A Zero-Trust Mobile Link Execution Framework for Protecting Users from Malicious URLs.** *[Accepted]*
5. **A Real-Time Lightweight Intrusion Detection System for Smart City Networks Using Optimized Deep Learning.** *[Accepted]*
6. **AI-Driven Real-Time Reading Assessment and Assistance System for Dyslexia Using Speech and Behavioral Analytics.** *[Under Review]*
